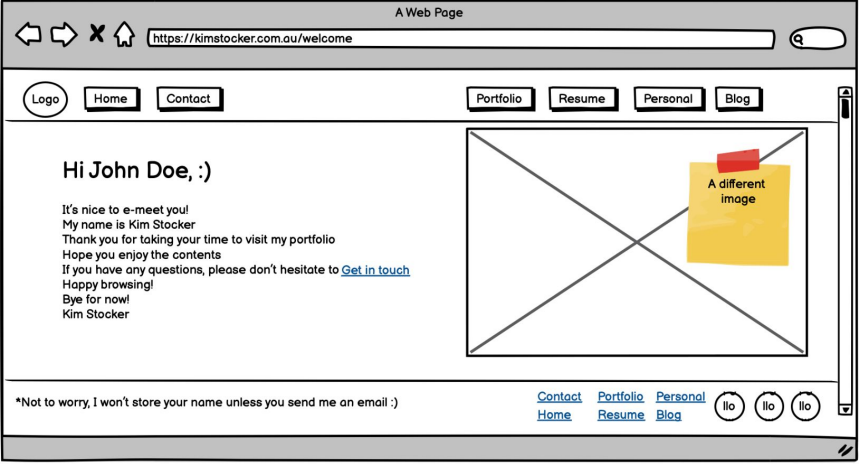
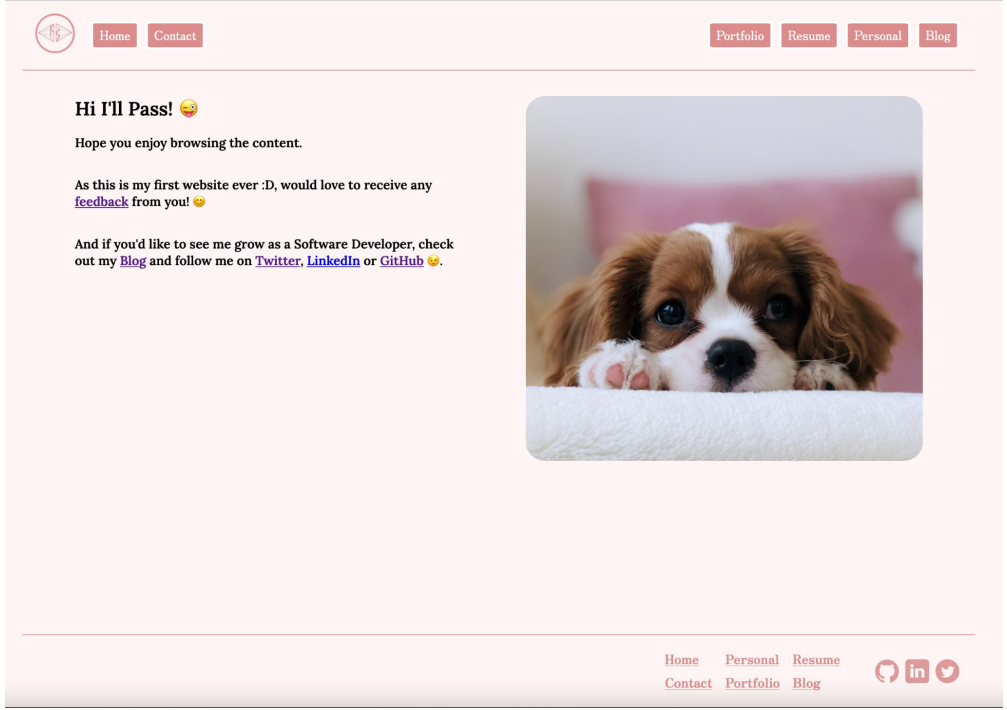
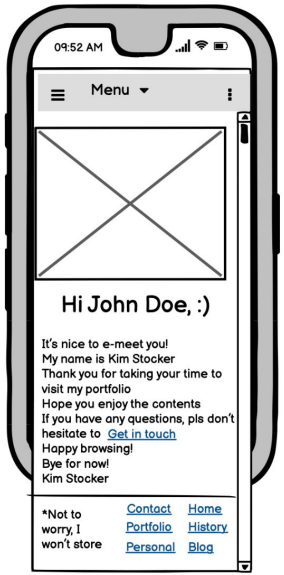
Home:

. Unable to deliver GIF of me waiving :D. Maybe in future.
. Encourage user input their name to create a more personal experience using simple JS code.
. Spent quite a bit of time researching JS and getting used to its syntax
. Spent a lot of time researching styling for the whole page. Color scheme, typography etc.
. Color scheme to match Hero image (Pastel nude color)
. Hope to evoke happiness and positivity with monochromatic color scheme
. Will try implement drop down menu with media query in future

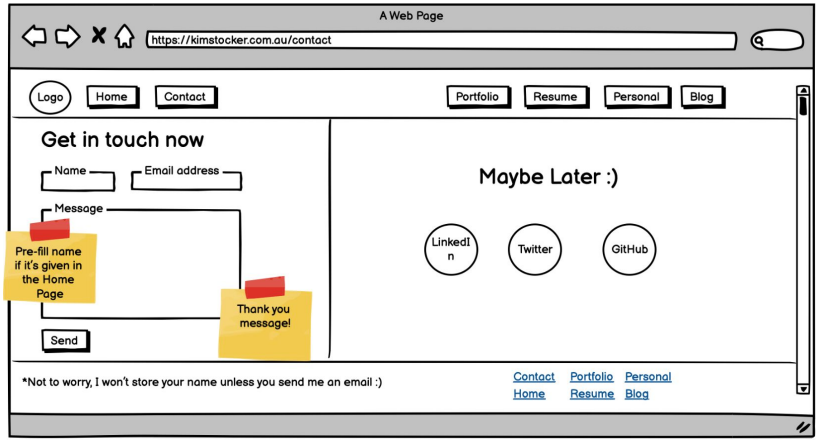


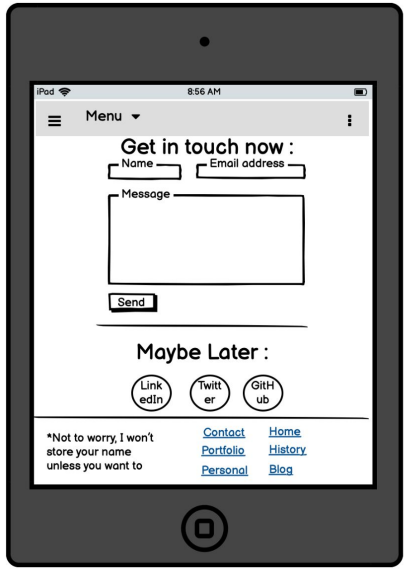


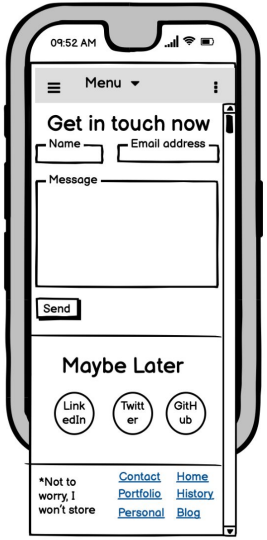


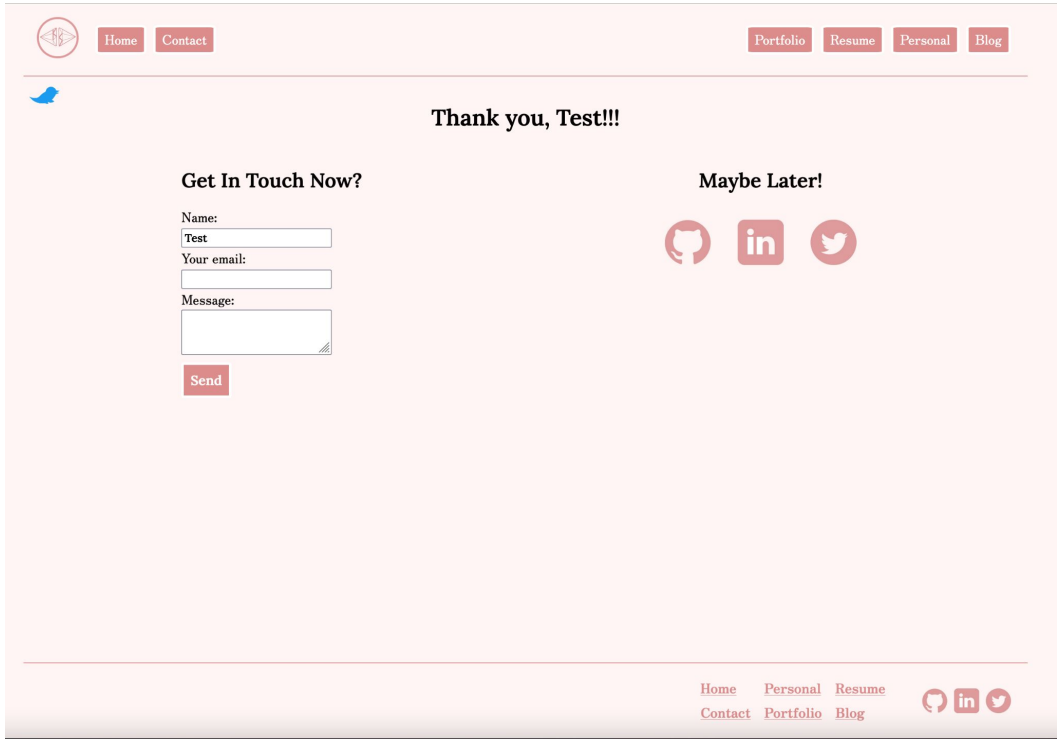
Welcome:

. Personalised greeting with their name.
. A bit of fun with "I'll Pass" joke.
. Puppy image to get the Aweee, postitive feeling from visitor.
. Invite to contact/feedback, check out Blog & follow social medias



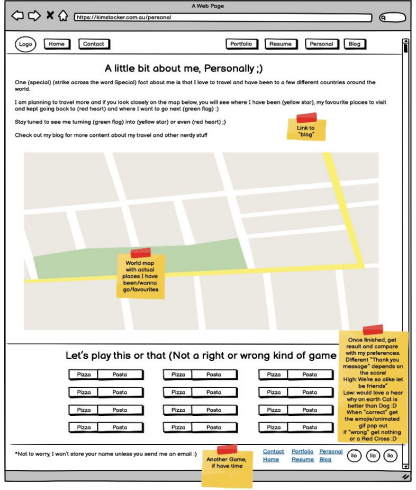


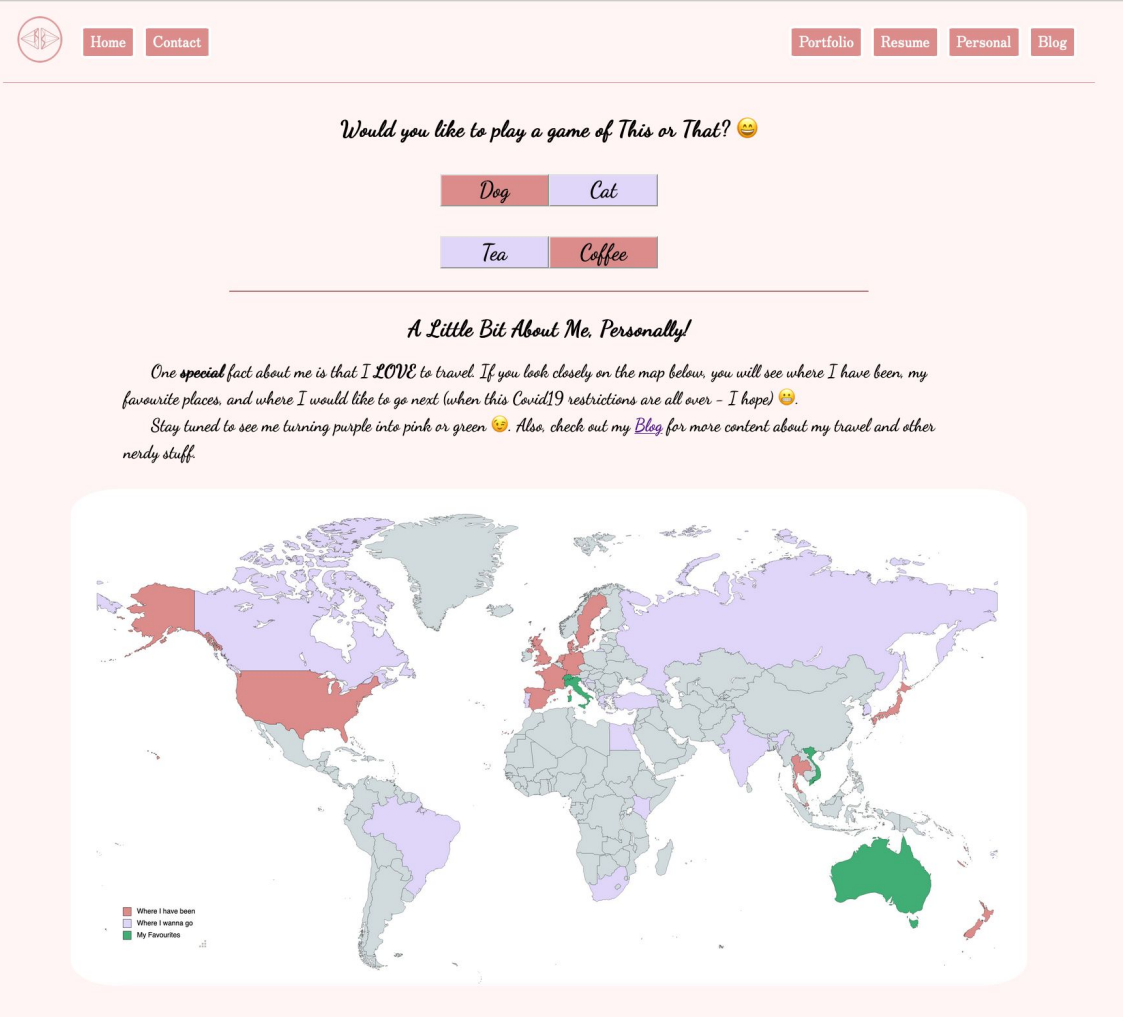




Contact:

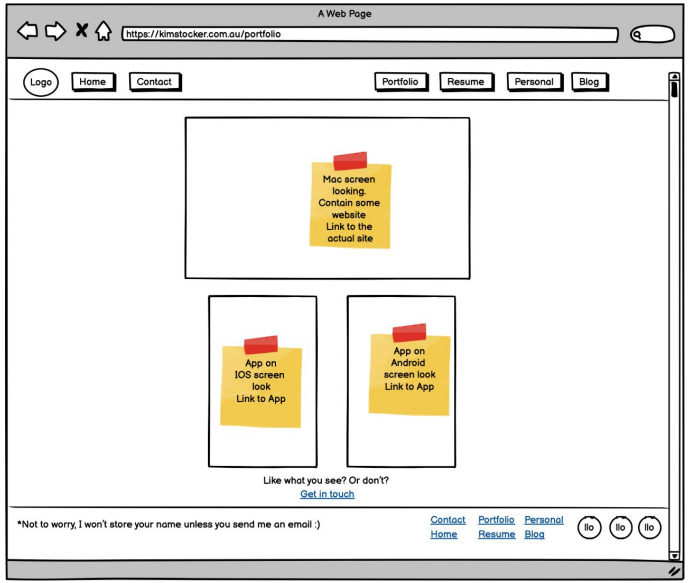
. a bit of a challenge with styling form fields and buttons. Will try tackle this again in next 2 days.
. Success with JS to prefill form with name input from home page to improve user experience
. Create personal thank you message from this same name input.

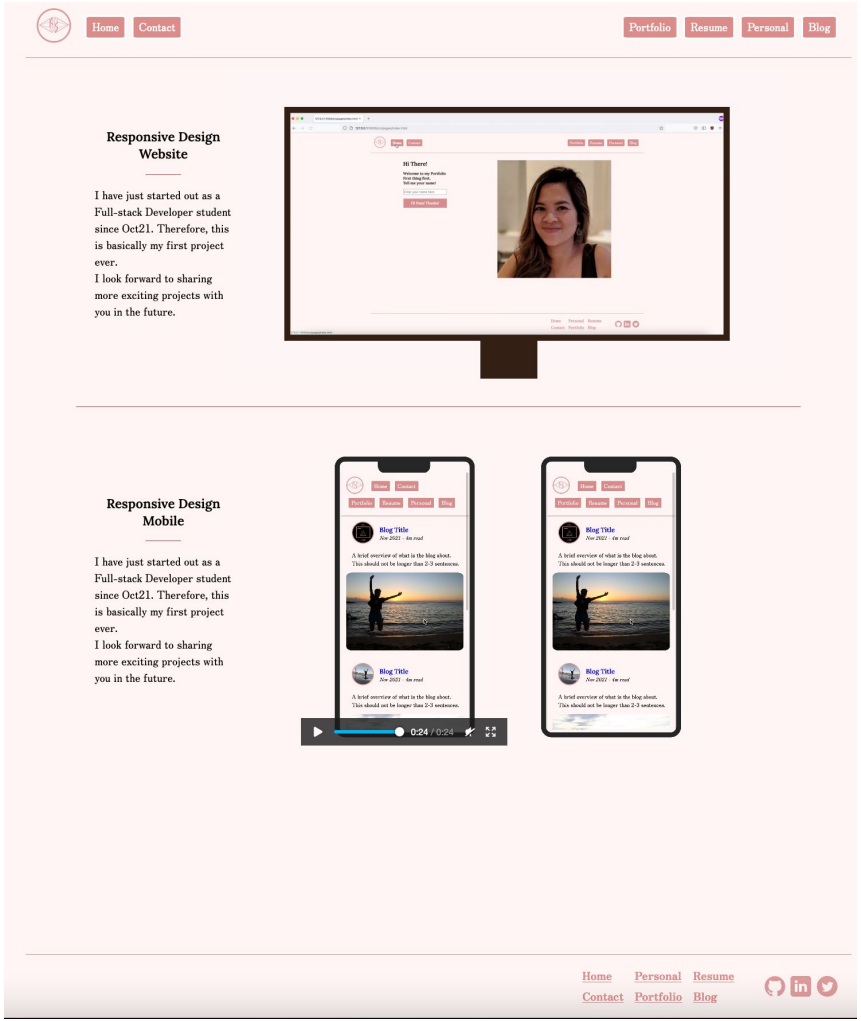


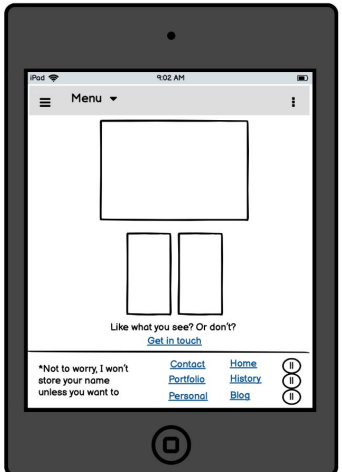


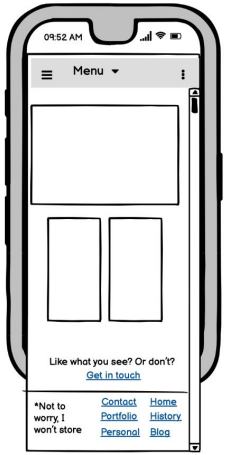
Personal:

.Plan to have more questions in the This or That game.
. Will add in next 2 days.
. Time consuming as each answers will give a dynamic message using JS.
. Planned to have some sort of live map but ended up with an image. Will do more research to implement in future.
. Cursive text style & emojis for a more personal feel.



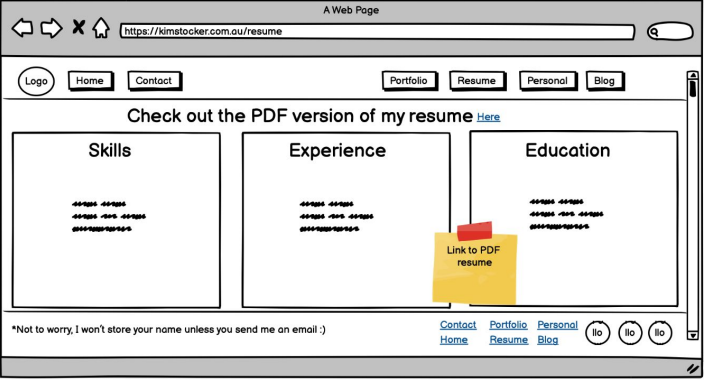


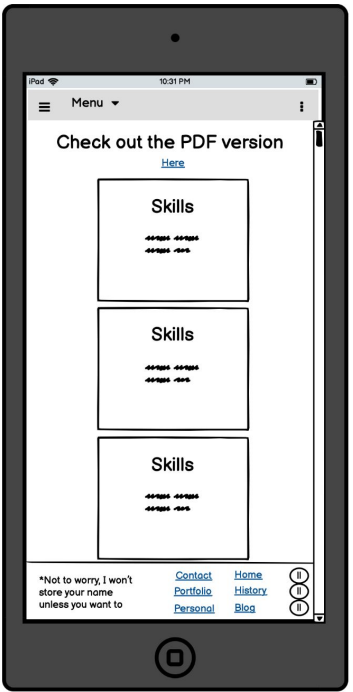


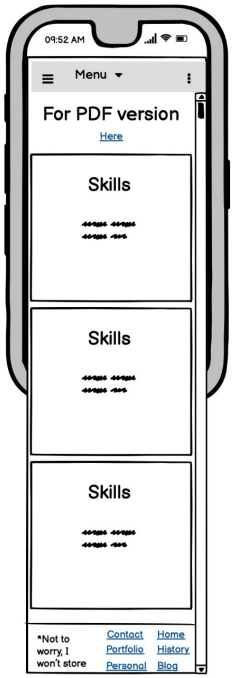


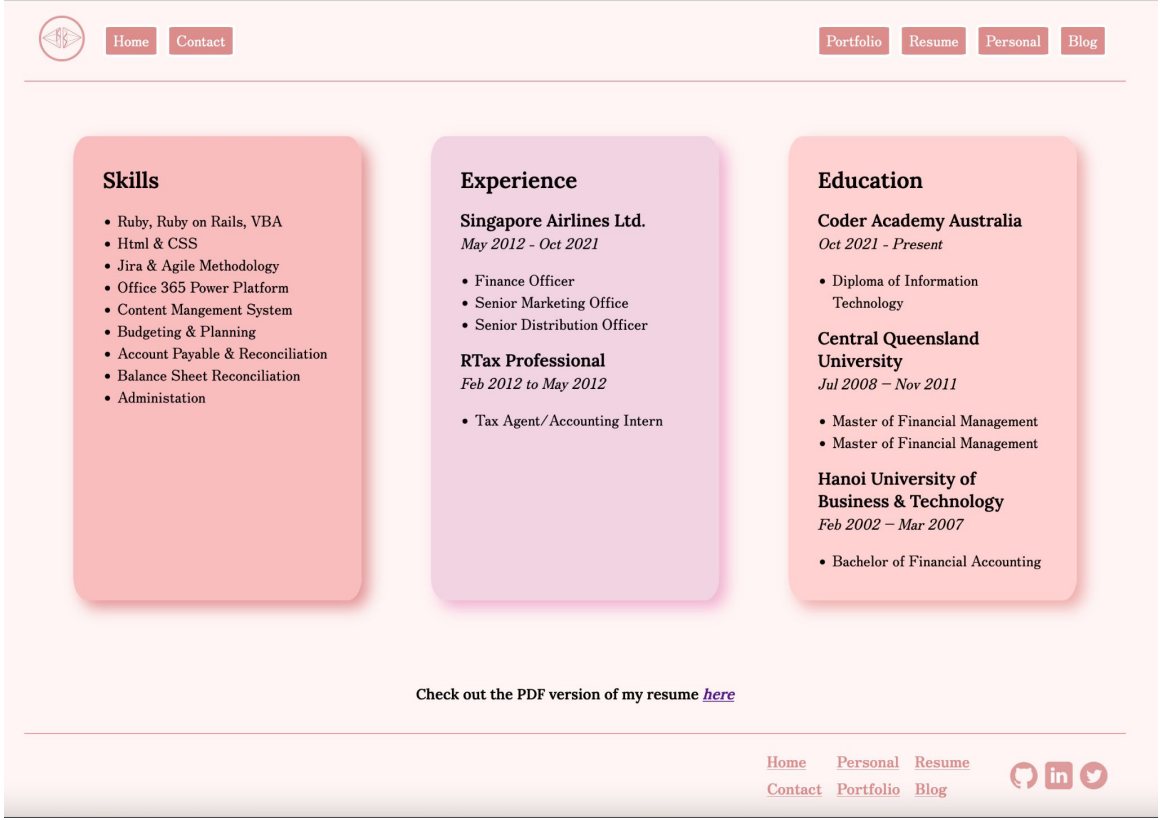
Portfolio

. Inspired by a few good portfolios websites.
. Videos to showcase the responsive design and functionality
. planned for the layout to stay the same across viewports but look better with 1 phone screen instead of two in Phone screen
. Did not add Get in touch link as this is not real portfolio yet :D



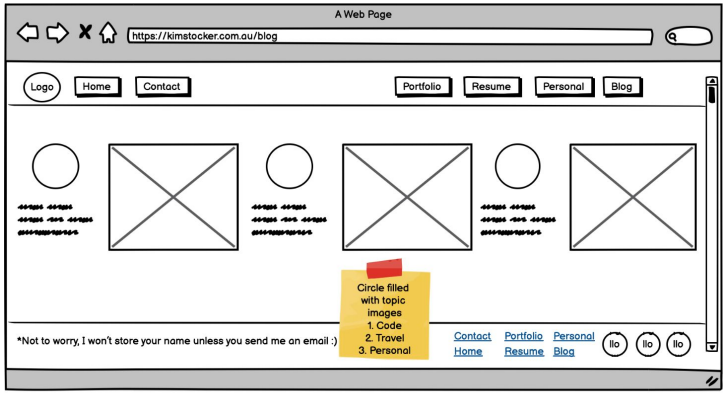


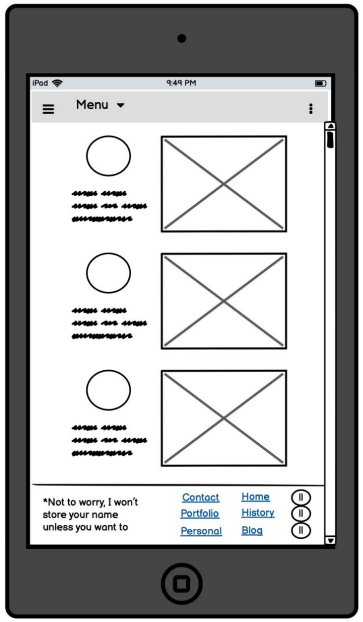


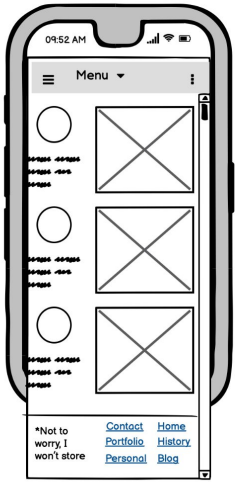


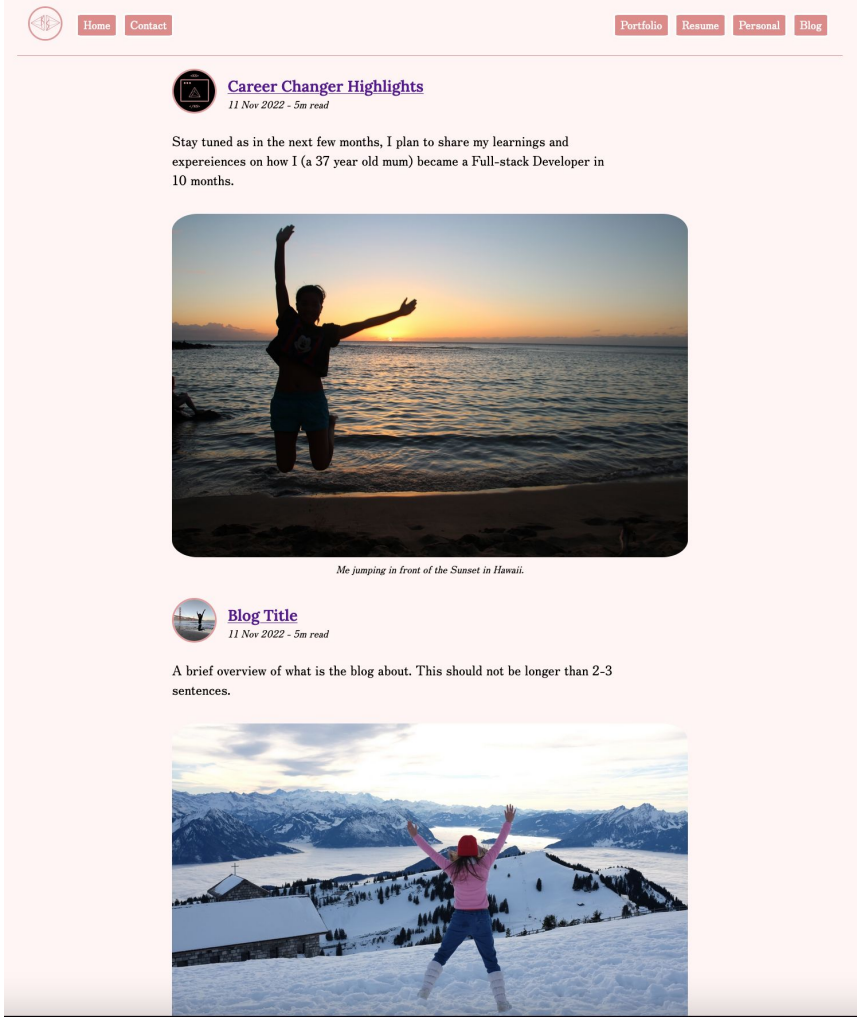
Resume:

. Results came out exactly as planned.
. Except the heading with link to PDF moved to the bottom as it looks nicer there
. Struggle with background colors a little bit.









Blog

.Planned to have 3 blogs in a row across bigger viewport but ended up with 1 as with 3 the images become too small
. Did not end up styling as planned for smaller screens as realised the styling would comprise image size and quality.
. Last minute change to use article tags instead of div for blog posts.
