# Kim Stocker

My First Portfolio Website

Planning

- ★ Assignment requirements.
- ★ Inspiration.
- ★ Hero image, images optimizer.
- ★ Layout, color scheme & typography.
- ★ Wire frames.

Development

- ★ Start with easiest page and go from there.
- ★ Research - Build - Test iterations.

Deployment

- ★ Subresource.
- ★ Lighthouse test.
- ★ Deploy to GitHub page.

A Web Page

https://kimstocker.com.au/home

Logo | Home | Contact | Portfolio | Resume | Personal | Blog

Buttons increase in size when hover over

Would be cool if the words appear as if you type it! Or slide show

Hello!!!

Welcome to my Portfolio.
First thing first!
What is your name?*

Enter your name here

I'll Pass thanks!!! :)

Can be a gif of me waiving

*Not to worry, I won't store your name unless you send me an email :)

Links enlarge when hover over
Change colour once visited

Contact | Portfolio | Personal
Home | Resume | Blog

Colour scheme:
Monochromatic warm colors
Extract from the hero image
Lip stick/skin/hair colour :)
Unify with Resume colour scheme
Hope to evoke happiness & positivity
#df9b9b

Special Feature, would be awesome to have
A little animated bird (twitter bird) Flying around on every pages and if someone catch it with their mouse, they can see the Twitter Follow me link. Encourage people to follow me on Twitter :D
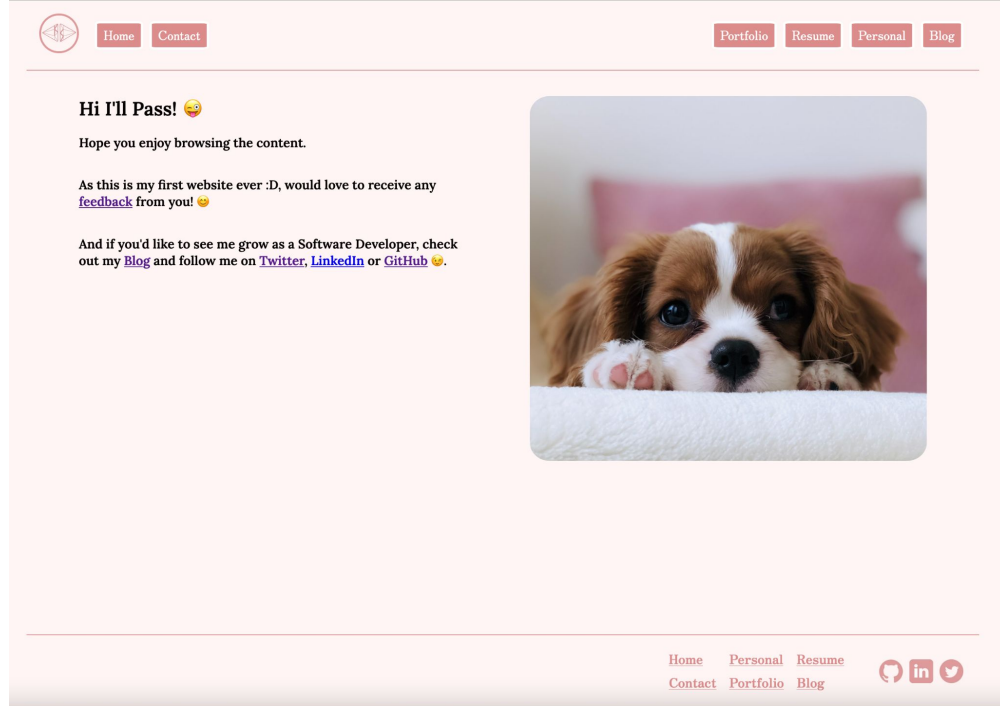

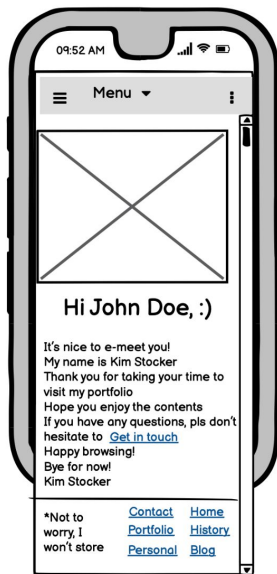

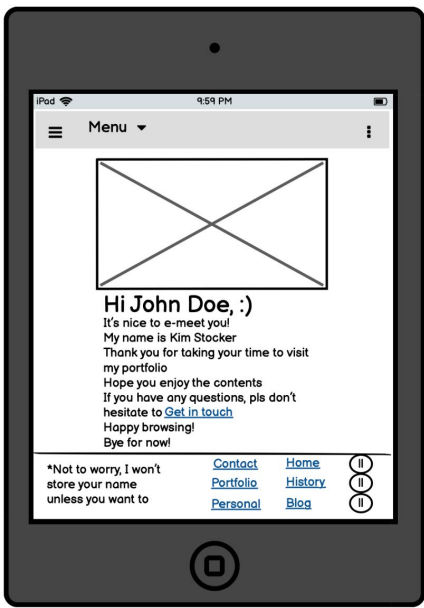

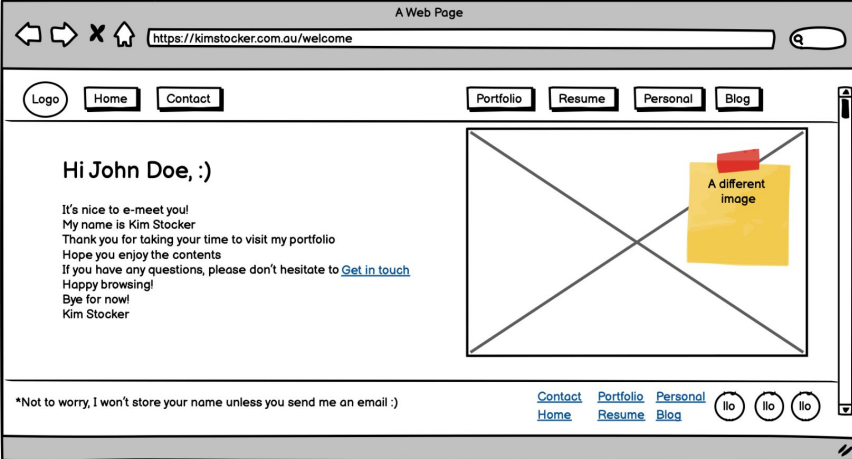

LinkedIn/Twitter /GitHub logos

Home:

. Logo: self-designed with Canva. Link to homepage
. Unable to deliver GIF of me waiving :D. Maybe in future.
. Encourage user input their name to create a more personal experience using simple JS code.
. Spent quite a bit of time researching JS and getting used to its syntax
. Spent a lot of time researching styling for the whole page. Color scheme, typography etc.
. Color scheme to match Hero image (Pastel nude color)
. Hope to evoke happiness and positivity with monochromatic color scheme
. Will try implement drop down menu with media query in future

Hi I'll Pass! 😜

Hope you enjoy browsing the content.

As this is my first website ever :D, would love to receive any feedback from you! 🙂

And if you'd like to see me grow as a Software Developer, check out my Blog and follow me on Twitter, LinkedIn or GitHub 😉.

Welcome:

. Personalised greeting with their name.
. A bit of fun with "I'll Pass" joke.
. Puppy image to get the Aweee, postitive feeling from visitor.
. Invite to contact/feedback, check out Blog & follow social medias

Contact:

. a bit of a challenge with styling form fields and buttons. Will try tackle this again in next 2 days.
. Success with JS to prefill form with name input from home page to improve user experience
. Create personal thank you message from this same name input.
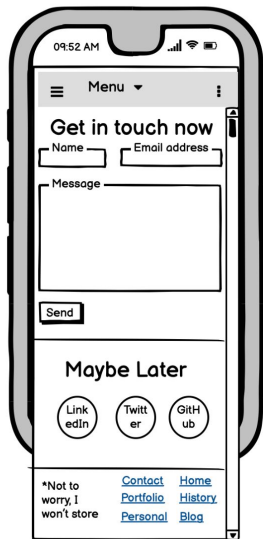

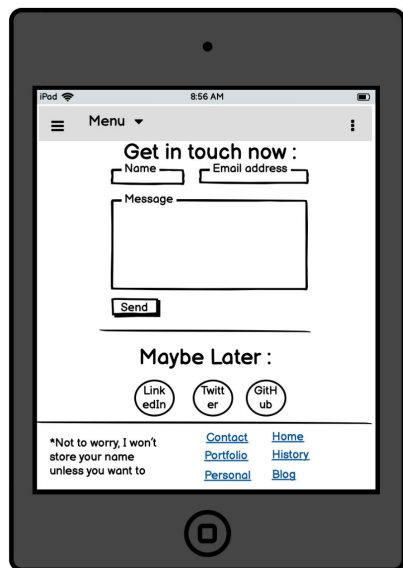

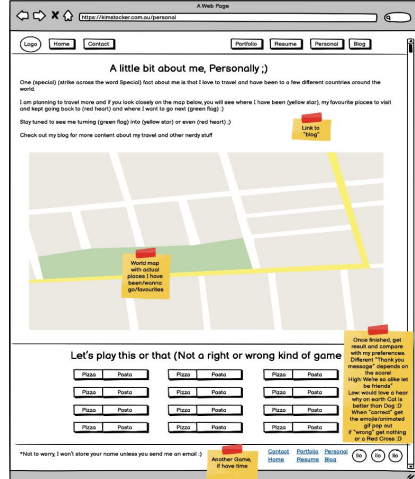

Personal:

.Plan to have more questions in the This or That game.
. Will add in next 2 days.
. Time consuming as each answers will give a dynamic message using JS.
. Planned to have some sort of live map but ended up with an image. Will do more research to implement in future.
. Cursive text style & emojis for a more personal feel.

Would you like to play a game of This or That? 😄

| Dog | Cat |

| Tea | Coffee |

A Little Bit About Me, Personally!

One **special** fact about me is that I *LOVE* to travel. If you look closely on the map below, you will see where I have been, my favourite places, and where I would like to go next (when this Covid19 restrictions are all over – I hope) 🙂.

Stay tuned to see me turning purple into pink or green 😉. Also, check out my Blog for more content about my travel and other nerdy stuff.

Portfolio:

. Inspired by a few good portfolios websites.
. Videos to showcase the responsive design and functionality
. planned for the layout to stay the same across viewports but look better with 1 phone screen instead of two in Phone screen
. Did not add Get in touch link as this is not real portfolio yet :D

Resume:
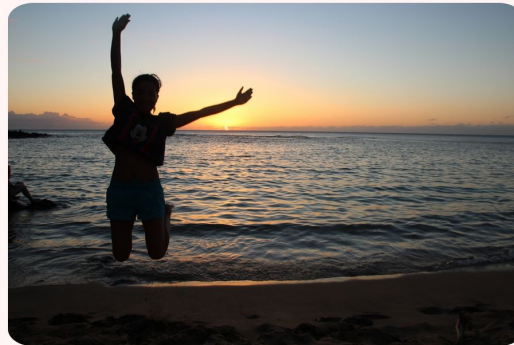

. Results came out exactly as planned.
. Except the heading with link to PDF moved to the bottom as it looks nicer there
. Struggle with background colors a little bit.
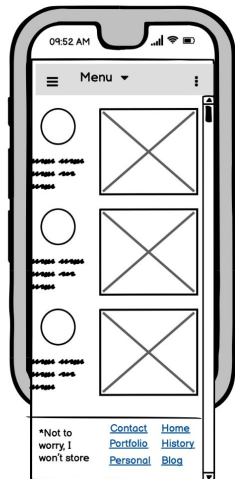

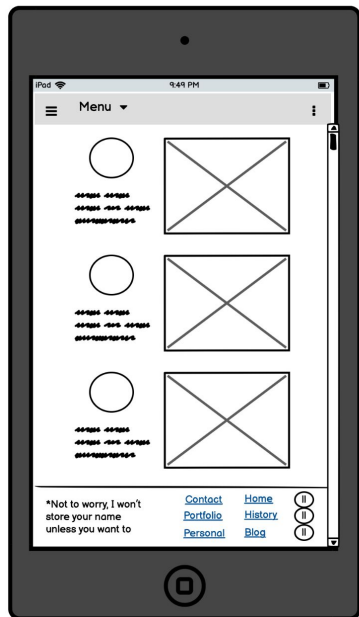

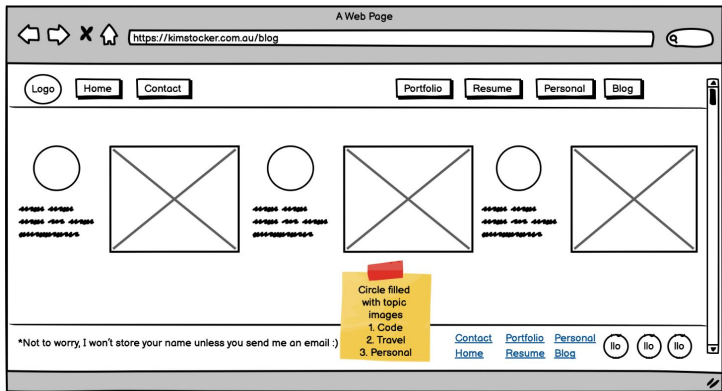

Blog:

.Planned to have 3 blogs in a row across bigger viewport but ended up with 1 as with 3 the images become too small
. Did not end up styling as planned for smaller screens as realised the styling would comprise image size and quality.
. Last minute change to use article tags instead of div for blog posts.

List of components:

- **Section/Header/Footer:** display flex, fixed height, border bottom and top respectively.
- **Nav bar, anchor links tags** on header and footer: Link tags with button style looking on header, link tags with logo images for socials. Text glow when hover over
- **H1, h2, h3:** scattered over the website, different font family, margin top and bottom.
- **P:** also in almost all different pages on the website. Cursive style in Personal page for more personal feel. Normal margin when needed.
- **Form & buttons on main & contact page:** button style to look like the header link tags.
- **Images:** All Images except logo and Blog-icon (border radius 50%) have 5% border radius. Sizes are styled depending on pages and media screen query.
- **Videos:** control panel and autoplay are turned on.
- **Ul:** mainly used in resume page. Margins are styled accordingly depending on the position of the UL.
- **Buttons on personal page:** style to match the map color scheme.
- **Article:** use for blog posts
- **Figure & figcaption:** for image & caption on the blog page. Style figcaption so fontsize is smaller and italic
- **Emojis:** used across the page for personality.

Challenges

- ★ Flexbox.
- ★ Keeping style pages neat and tidy.
- ★ JS code.
- ★ Deciding on Color for each elements.
- ★ Ensure no copy/paste code.

Favourites

- ★ Flexbox once figured it out.
- ★ JS code once got the hang of it :)
- ★ Little wins when you found the "bug" and fixed the problems.

Thank You
